

Boldfield and Sage

- the secret power behind your business

Sage is famous for being the financial engine for more than half of the UK's companies. It's a powerful and flexible system that will deliver real success for your business – if that is, you talk to people who really understand how to make it work for you.

At Boldfield, we know Sage backwards and we can be by your side in all things Sage. We always start with your business objectives – be they to drive sales, improve profitability, control assets, link information silos – whatever it is we'll make sure everything is customised to your business. We can advise on what to buy and what not to buy and how to get the most from it. We'll install it, train your people and then check in to make sure you're getting on with it just fine. What's more, we're always on the end of the phone for questions.

The best that Sage has to offer ...and more

Sage covers all aspects of running a business: cash flow, payroll, VAT, sales, CRM, resource planning, budget planning, forecasting, ecommerce and process management. We offer all these services and understand how to link them together to give you an efficient engine driving your business success. We work with Sage 50, Sage 200 plus support for Sage Line 100, Sage MMS, Sage Payroll and Sage HR.

So good we can develop in Sage

We're also a developer for Sage and there aren't many IT companies that can say that. As an accredited Sage partner and developer, products that we've developed are featured in the prestigious Sage Additions Guide. We've written software programmes for tasks like: sending invoices, statements, letters electronically, handling stock, improving your cash flow, tracking transactions and repeat billing.

All our staff are accredited individually on Sage products every year to make sure we are bang up-to-date. In fact, we spend a small fortune on training so we can give you the very best advice and service.

Solid financial understanding

As well as understanding Sage backwards, our people have accountancy knowledge too. This comes in very handy since many of our clients have questions relating to the financial management of their business.

Use Sage for sales and marketing

Sage also offer comprehensive tools to connect with your customers and prospects – ACT and Sage CRM - Customer Relations Management software. These help you to turn your enquiries into contacts and loyal customers. What's more, they link the sales and marketing to the finance of your business so you can manage your sales cycle and cash flow in a streamlined way.

If you want to run your business effectively and generate good profits, with a lot less hassle, call us today on 01223 852660 and find out what it feels like to be treated as a valued customer.
