Boldfield have been providing us with expert IT consultancy and support in the UK since 2007. From an initial contract that covered only our Cambridge site we have since asked Boldfield to support our sites in Aberdeen, Bridgend, Hartlepool and Rotherham as we expanded the company through organic growth and acquisition; Boldfield have readily adjusted to this change of scope and are providing support for us nationally.

We have come to regard Boldfield as a true partner supporting us through our rapid growth, constantly adapting to meet the new challenges we set them and providing us with strategic input to develop our Information Technology plan. Their support is vital to a business of our scale and technical bias and allows us to focus our energies on our clients.
